17-Sep	13	
24-Sep	5.5	
1-Oct	4	
4-Oct	20	
8-Oct	5	
16-Oct	6	

Total 313.5 buckets

Notes: This year, during the peak season 8/4 - 9/8, we failed to harvest the entire patch on any shift. This probably lowered the yield.

This year, we didn't complete the string weaving, which probably lowered the yield.

This year, the foliage was very healthy, and the fruit stayed a good size till the end, which undoubtedly increased the yield.

The usual peak is 40-70 buckets on one day, 8/7-8/28

The 10/4 harvest was most of the patch, in preparation for frost. Frost was very light. We harvested twice more.
