

# Fall Brassica Schedule

2016

Pam's Vacation: Weeks 5&6 (Weds 7/13-Weds 7/27)

Revised 2 July 2016 by Pam

- On the same day of each week ( Fri, Sat, Sun ) , sow, label, water, hoop and ProtekNet the "Feet Plan" for that week. Allow 3 hours. Make a map.
- Check and record the germination of the previous two weeks' sowings. (Perfect = one plant per inch) Weed and thin to 1". Often the seeds sown the previous week won't be up yet.
- In a fresh row, sow top-ups for varieties with a germination less than 80%. Enter the info in the column for the current week. Example:  
If Arcadia week 2 germ = 12' (at 1/inch) visible in week 4, sow 10' in the week 4 bed to make up to the 22' needed, and write 10' in the Arcadia row in the week 4 col  
There are no sowings in weeks 5-8 except resows and kale beds.
- Transplant at 3-4 weeks old:  
Week 4 (7/8-7/14): Transplant week 1 cabbage  
Week 5 (7/15-7/21): Transplant week 2 cabbage, broccoli, , any week 2 resows  
Week 6 (7/22-7/28): Transplant week 3 cabbage, broccoli, senposai, Yukina Savoy; and any week 3 resows.  
Week 7 (7/29-8/4): Transplant week 4 senposai, Yukina Savoy, collards and resows. Also fill gaps in week 4 transplantings (= week 1 sowings)  
Weeks 8 & 9 (8/5-8/19): Transplant week 5 collards anything you didn't keep up with, and replacements in weeks 5 and 6 transplantings (weeks 2 & 3 sowings)

**Sow around a foot of seed row for every 12'-15' of crop row, aiming for 3-4 seeds per inch**  
**\* = all seed of a variety is gone. If you need to buy more seed, quickest is to buy from Johnny's on our account.**

Seed bed size:

sowing dates for crops w/ various days to maturity	Days to Harvest	Harvest mid-Sept- mid Oct	Harvest late Sept- mid-Oct	Harvest from mid-Oct

Make 4 copies: Field Manual, Greenhouse, Shed, Crop Records File. Original to Garden Notebook

We are experimenting with the formula on cabbage. It's 30% more than broccoli. 70% more was too much

Note replacements in space below: (If you run out of seed for something, choose replacement with closest # growing days, keeping an eye on top right chart to make sure you don't sow something too late. Try to have only one sub for missing variety.)
